

DocWeb - Publish your technical information

DocWeb is a software application for publishing structured documents on web.

DocWeb simplifies the maintenance and support of product equipment and give organisations fast and accurate access to technical and legacy information. DocWeb combines system descriptions, operations procedures, HSE-information and other technical information into a single coherent tool for all type of employees within an organisation.

DocWeb helps to automate the creation and deployment of online information. DocWeb transform content into an intelligent, extensible web based application that can be seamlessly incorporated into an organisations website and/or an information portal. The user will easily browse through thousands of pages with text, tables, graphics and other related information like CBT's.

> > > > >

With its extended use of hyperlinks, the users can access directly to the right information at the right time.

Features:

- Easy to navigate with an intuitive table of contents
- Easy to search with multiple search functions, including custom specific fields, full-text search, and search hits list
- Full formatted print capability with pdf
- Attribute and user-group filtering

Benefits:

Quick (effective) information retrieval

DocWeb easily browse through thousands of pages of text, graphics and tables with powerful search and intuitive navigation capabilities. DocWeb's support of information structures reduces the time used for navigating and/or searching directly to the relevant information.

Reuse of information objects

DocWeb uses a single source publishing for all of the documentation, both on web and for print. This ensures that you always have the right information in your organisation.

Always updated information

DocWeb's interface is intuitive and easy to use. This makes updating information simple and not time consuming.

Cost effective

DocWeb is one of the markets most effective publishing systems that only generate the information once and publishing it automatically on web and paper. DocWeb's integration tool gives you easy and quick access to e-learning, drawing archives, revision management directly from the relevant documentation.

Improved safety and knowledge

DocWeb improves workforce safety and compliance with always updated information. When enabling DocWeb as your source of information, the system eliminates errors related to out-of-date, inaccurate or missing content.

Increase maintenance productivity and asset availability

DocWeb increases maintenance productivity and asset availability by enabling technicians to quickly identify relevant service procedures, technical updates, best practices and product drawings/ specifications through automatically generated, and logic-driven, hyperlinks.

XML information structure

DocWeb's internal format is the W3C standard XML and it supports all types of document structure (DTDs) standards like S1000D, DocBook, DITA and more. With its flexible architecture DocWeb supports all types of customer specific structures.

Integration

DocWeb is easy to integrate with other critical applications.

- Integration with CBT's gives a seamless integration with relevant e-learning modules.
- Integration with SAP drawing archives gives the user directly access to relevant drawings.
- User based revision automates the handling process of revisions and integrates with most common application for Revision management.
- DocWeb supports effective authoring environments and integrates with the most popular authoring editors.

About Docstream

Docstream provides solutions, which combine both software and services that are tailored to meet the unique needs of technical and product documentation markets. These software and services helps our customers to effectively create, manage and publish technical and legacy information.

By delivering complete solutions for handling installation, operation, maintenance and legacy documentation, Docstream maximizes customers' profits through improved workforce productivity, safety and equipment uptime.

Docstream provides solutions based on documentation standards in markets for oil and gas, industry and government. Our focus is to give our customer a stable and flexible solution for their documentation.
